

Dear Commissioners,

I urge you not to implement Broadband over Power Lines because of the interference it would cause to two-way radio communications. Power lines are everywhere. Broadband radio frequency interference would be impossible to filter, obliterating reception and rendering two way radio communications in NUMEROUS bands useless. This includes several amateur bands that are often the only reliable communications link in emergencies. The integrity of these radio communications essential in saving citizens' lives in every imaginable emergency, from terrorist attacks to natural disasters. I am a CB operator, the 11 Meter band would also be decimated by the implementation of BPL, so I have a personal interest in the outcome of this issue. Our country would be LESS secure with the implementation of BPL. I urge you to do what is right for our national security and public safety. Keep America safe and strong. DO NOT implement Broadband over Power Lines.
